

Danielle Fence Makes A Difference One Yard At A Time

In 1976 two local teenage brothers, Marc, 13, and Paul, 17 Glogower, borrowed some tools, a couple of Grandma's chairs (aka sawhorses), and started building fences after school. The boys hired their father to handle the installations. After all, he did have a driver's license. Thirty-two years later, they've returned the borrowed tools and put back the kitchen chairs, but are still building fences.

With the Embossed Textured Vinyl, homeowners can get the look of wood grain textures and patterns for a rich, deep wood look and feel but with the easy care and maintenance of vinyl. Wood fencing is offered in four styles utilizing three types of wood - Super Sealed, Red Cypress, and Eco Plus.

Homeowners who want to turn their fenced-in yard into an outdoor living space envied by friends and neighbors need look no further than Danielle Fence.

Their passion, hard work and drive have built one of the largest fence, deck rail and outdoor living manufacturers and providers in Central Florida. And while their corporate offices, showroom, and manufacturing facilities are still located in Mulberry, a quick peek at their website lets you know that these local boys do a lot more than build fences in Polk County now.

Marc and Paul, long known for their reputation as innovators, decided a fence product was

needed that would withstand the harsh elements of Florida's weather. They found a PVC supplier and co-developed PVC fence products that carry the best warranties in the business.

Danielle Fence has built its reputation on giving customers the highest quality product. That's why Danielle Fence was chosen as the exclusive distributor and fabrication facility for the

Country Estate fence, the top of the line in Vinyl PVC Fence and a Simulated Stone Fence by SimTek.

You'll find that quality in all their fencing products from vinyl to wood and aluminum and now in the new simulated stone fence products. The simulated stone fence, featuring a distinctive granite/stone look, is a strong polyethylene material made to withstand high velocity winds while creating a natural sound barrier.

Ever the forward thinkers, Paul and Marc are now moving into your back yard with arbors, gazebos, pergolas and eco-friendly outdoor furniture. Water features, ponds, pool waterfall kits, artificial rocks, cascades and creeks to transform your backyard into a peaceful sanctuary. When it's time to get horizontal, check out their collection of the world's finest hanging furniture or lay back in a traditional hammock.

Danielle Fence vinyl decking is just what the homeowner with a pool needs to keep that free time free. Without the need for waterproofing with sealants or chemicals, the surface is a safe place for children and pets to play. Durable and priced competitively with wood composite decking, Danielle Fence vinyl decking is made of 100% virgin vinyl.

While the founders of the family-owned and operated Danielle Fence may still be growing the company and moving forward, one thing they will never leave behind are the passion and values that drive them. Danielle Fence does not use any subcontractors. All employees are individually trained to perform their job.

Full-time service, sales and installation departments handle all of the customers' needs. "At Danielle, the difference is the focus on exceeding each client's needs, wants and expectations," says Marc Glogower, President of Danielle Fence. "Our goal is to take care of our customers. We want to do the right things for the right reasons at the right time and do them in the right way." Call 800-255-6794 or visit www.daniellefence.com.
